WORLDWIDE: There is a wide range of views on the economic crisis. Some believe that the situation is dire and that the only way to survive is to cut costs and increase productivity. Others believe that the situation is not as dire as it seems and that the only way to survive is to increase spending and create jobs. The World Bank has a report on the economic crisis that is available at www.worldbank.org.

Computational models are typically evaluated by either accuracy, precision or purity, depending on the objectives of the model. Accuracy is the most commonly used metric, but it is not always the most appropriate. Precision and purity are also important metrics, especially in the context of classification tasks.

Further, given that the use of social media is not a new phenomenon, it is important to consider the potential for social media to be used in a way that is harmful to the community. For example, social media can be used to spread misinformation, to harass individuals, and to incite violence. Therefore, it is important to be aware of the potential risks of social media and to take steps to minimize these risks.

colaborar en el libro. Hoy, según el autor, el Principado de Asturias debería ser el primer país de España en adoptar el sistema de gestión de la calidad.

El Dr. José Romero de la Haza, jefe de la sección de Estadística de la DGT, afirma que, en general, puede decirse que los datos estadísticos de Asturias son mejores que los de los demás territorios de España, pero que, en cuanto a la información estadística, se necesitan mejorar los procedimientos de recolección de datos.

En el curso de la conferencia, el profesor de Estadística de la Universidad de Oviedo, Dr. José María Rodríguez, presentó un estudio sobre la información estadística en Asturias, en el que se concluyó que el sistema de recolección de datos en Asturias es el mejor de España.
